

THE 1858 CENTS OF PROVINCIAL CANADA – VOLUMES I & II

“Anyone interested in studying Victorian coins of any denomination would gain from reviewing the material presented here, both in content and in style.”

Canadian Coin News

“Turner has elevated the bar in Canadian numismatic research.”

Canadian Numismatic Journal

“From beginning to end this book is a quality production that will be a handsome addition to any numismatic library.”

David Lange, Numismatic Author

Two volume set available for \$135 USD. \$20 USD S&H added to all orders. Paypal or cleared personal checks accepted. Order from the author at rob1953@cox.net

This hardcover two volume set includes:

- A full description of the political and economic events leading to Canadian decimal coinage.
- An informative history of the Canadian provincial coinage, including extensive descriptions of the minting process.
- Die catalogs (two pages per die) for both the 1858 cents and the 1859 wide 9 over 8 cents.
- The relative rarities of each obverse die, reverse die, and die marriage used to mint 1858 and 1859 wide 9 over 8 cents.
- Nearly 600 full color photographs to assist readers in attributing coins.
- Volume I has 330 pages. Volume II contains 136 pages.

DIES & DIADEMS

Have you ever wondered how, or why, certain design features and flaws appeared on some Victorian cents, but not others? If you have, then this beautiful 302 page hardcover book is for you.

Dies & Diadems presents a matrix, punch, and die study for the entire Victorian cent series, minted from 1858 to 1901. Knowing the relationships between these minting tools allows readers to understand how die varieties propagated throughout the series. The book contains:

- Detailed descriptions and photographs of the transitions from the Provincial obverse design through the five Dominion obverse designs.
- Detailed descriptions and photographs of the transitions from the Provincial reverse design through the two Dominion reverse designs.
- A comprehensive die catalog (one page per die) of obverse and reverse dies used to mint the cents of 1891, the most interesting year of the series.

Dies & Diadems available for \$100 USD. \$20 USD S&H added to all orders. Paypal or cleared personal checks accepted. Order from the author at rob1953@cox.net

If you order one book, or all three books, you still only pay \$20 USD shipping & handling.

- The relative rarities of the dies and die marriages used in 1891 with mintage estimates for the six major 1891 varieties.
- Introduction of a die numbering system that covers the entire Victorian cent series.
- Graphic diagrams showing how the various minting tools related to each other.
- Over 700 high resolution, full color photographs that wonderfully illustrate the points being discussed. Many photographs depict beautiful mint state coins from the author's collection.
- A few surprises for even veteran collectors.

"Dies & Diadems...lives up to the author's established record of producing outstanding specialist reference material."

Canadian Coin News

"Dies & Diadems delivers the most in-depth and interesting analysis of this series available anywhere. The book should be required reading for any Victorian decimal collector."
